SECURITY & DATA PROTECTION SOLUTIONS

Backup

QNAP

About QNAP

QNAP Systems, Inc., headquartered in Taipei, Taiwan, provides a comprehensive range of cutting-edge Network-attached Storage (NAS) and video surveillance solutions based on the principles of usability, high security, and flexible scalability. QNAP offers quality NAS products for home and business users, providing solutions for storage, backup/snapshot, virtualization, teamwork, multimedia, and more. QNAP envisions NAS as being more than "simple storage", and has created many NAS-based innovations to encourage users to host and develop Internet of Things, artificial intelligence, and machine learning solutions on their QNAP NAS.

Backup

Files and data are of the utmost importance for business operations. How do we ensure effective business continuity as well as data security & restoration?

Productivity

We only have 24 hours in a day. I want to multiply my productivity to finish more tasks in less time. Any way to help me?

Virtualization

Budget constraints are an unfortunate reality for most businesses. Where can we get the most cost-efficient storage with optimized performance and stability?

Surveillance

Keeping our data safe is a high priority, but what about the safety of our homes/workplaces? How do we ensure that we can monitor every corner, and centrally store and manage a large number of surveillance recordings?

VOIP SOLUTIONS

VOIP Solutions

Yeastar

Types of Devices

S412 VoIP PBX
S20 VoIP PBX
S50 VoIP PBX
S100 VoIP PBX
S300 VoIP PBX

For more than 10 years, Yeastar VoIP phone systems have served more than 100 countries and they love the flexible, reliable, powerful, and cost-effective solution.

Scalable and Modular Design

Business will have the flexibility to customize telephony interfaces (FXS/FXO/GSM/3G/4G/E1/BRI) and scale up when business grows.

Powerful Capability

All-inclusive features without extra licensing fees plus a unique App Center that can add and manage features independently.

Free Mobile Client App

The free Linkus Mobile Client transforms Apple or Android mobile phone to office extensions and brings mobility and reachability.

Simple and easy-to-use

Everything can be easily configured on the intuitive Web GUI: configure batch IP phones (auto provisioning), set up branch offices, and more.
